

AEGIS PROTOCOL.

The security layer for BNB Chain DeFi.

Real-time wallet monitoring · AI risk reasoning · Risk-priced yield

LIVE ON BSC MAINNET · LISTED ON DAPPBAY

EASY Residency / MVB Application · May 2026

Retail DeFi on BNB Chain is hemorrhaging money

And the existing "safety" tools are static, shallow, and passive.

- Hundreds of millions lost each year to honeypots, rug pulls, and silent LP removals.
- Most scanners run one check, give a green tick, and never look at the token again.
- By the time a user opens a dashboard, the rug has happened.
- Existing tools spam the same alert until users mute the channel and miss the real one.

BSC TOKENS DEPLOYED DAILY

10,000+

Rugs hide in the noise.

AVG TIME-TO-RUG AFTER LAUNCH

< 72h

Static scans miss it.

BSC TVL EXPOSED TO RETAIL RISK

~\$5B

Live target for scams.

Aegis Protocol

The always-on security & risk-aware yield layer for BNB Chain.

01 · GUARDIAN SHIELD

Live wallet monitoring

Cron-driven scans every 5 min.
25-rule risk engine: honeypot,
owner privileges, LP locks,
tax mutability, whale moves.

Diff-aware Telegram alerts:
new / escalated / cleared.
Silence when nothing changes.

02 · AI SCANNER

Verifiable risk reasoning

Llama-3.3-70B via Groq runs
on every BNB Chain token.

Structured, evidence-cited
analysis — not vibes.

Every decision logged on-chain
through DecisionLogger contract.
Auditable, immutable, public.

03 · AEGIS VAULT

Risk-priced yield

Non-custodial vault live on
BSC Mainnet.

Rebalances based on Guardian's
risk signals — yield that
actually prices in what your
collateral is doing.

10% perf fee aligned with TVL.

Built. Shipped. On mainnet.

Not a deck. Try it now at aegisguardian.xyz.

token-gated tier system

DAPPBAY

LISTED

official BNB directory

- Two smart contracts deployed and verified on BSC Mainnet (Vault + DecisionLogger).
- Cron monitoring runs every 5 minutes on every subscribed wallet — 24/7.
- DappBay listing approved — listed in BNB Chain's curated directory.
- Hackathon traction: post-win, \$UNIQ saw a sharp wave of organic buyers.

Token-gated tiers + B2B API + vault fees

Three revenue streams. One aligned token.

FREE

0 \$UNIQ

- Wallet & token scans
- Basic Telegram alerts
- Risk score visible
- Public dashboard

BRONZE

10k \$UNIQ

- Priority cron schedule
- Holder concentration
- LP lock tracking
- Custom alert rules

SILVER

100k \$UNIQ

- Multi-wallet portfolios
- Contract whale tracking
- Dev wallet surveillance
- Webhook integrations

GOLD

1M \$UNIQ

- Full Groq AI reasoning
- DecisionLogger receipts
- Vault auto-rebalance
- Private API access

PHASE 2 REVENUE

B2B risk API for DEXes & wallets · Vault performance fee (10%) · White-label Guardian

aegisguardian.xyz

dappbay.bnbchain.org/detail/aegis-protocol

BNB Chain native · Mainnet

TAM is enormous. SAM is immediate.

BNB Chain first — then horizontal across every EVM

TAM	\$1.5–\$4.5B / yr	10% of BNB Chain monthly traders paying \$5-15/mo equivalent in \$UNIQ
SAM	\$50–\$100M ARR	Risk-priced vault perf fees + B2B API to DEXes on BSC
SOM (Yr 1)	\$1–\$3M ARR	5,000-10,000 Bronze+ tier holders + 2-3 DEX API contracts

Everyone scans. Nobody watches.

Most tools give a one-time score. We're the only live, diff-aware layer.

MOAT

Diff-aware alert engine + On-chain AI receipts + Token-aligned distribution + Vault closes the loop.

Founder

FOUNDER · CEO · ENGINEERING

David Praise Francis-Omogbai

Solo technical founder. Computer Science (B.Sc) graduating 2026.

Builder profile:

- Multiple hackathons won — solo, no team.
- Shipped numerous dApps across EVM ecosystems.
- Aegis is end-to-end solo: contracts, indexer, AI layer, frontend, ops.

Public work:

- DoraHacks: dorahacks.io/hacker/i_am_dflame
- GitHub: full Aegis stack open for inspection.

Hiring next with MVB support:

- Technical co-founder (Solidity / audit background)
- Head of Growth (BNB Chain ecosystem + KOL distribution)

WHY THIS WORKS

I ship faster than teams.

I wrote the smart contracts,
the indexer, the AI prompts,
the diff-aware alert engine,
and the dashboard.

What I need MVB for:

1. Capital for first two hires.
2. BNB Chain GTM & intros.
3. 10 weeks to focus full-time.

Roadmap

12 months from solo product to BNB Chain security infrastructure.

NOW

Mainnet live, DappBay listed

- Guardian + Scanner + Vault shipped
- Diff-aware Telegram alerts in production
- \$UNIQ tier system operational
- DappBay listing approved

+3 MO

Distribution & data

- 10 KOL partnerships
- Public risk API (v1) live
- First DEX integration in progress
- 1k+ subscribed wallets

+6 MO

B2B + multi-chain

- Two paid DEX/wallet API contracts
- Open-source rule engine release
- Ethereum + Base support
- 5k+ subscribed wallets

+12 MO

Become the layer

- 10k+ wallets, 5k+ Bronze+ holders
- PancakeSwap risk badge integration
- Institutional risk API tier
- Series A readiness

The ask

EASY Residency + MVB joint support.

01

Capital

YZi Labs investment to hire first two key roles — technical co-founder and head of growth.

Runway to focus full-time

02

Ecosystem

BNB Chain co-marketing, DappBay featured placement, intros to PancakeSwap, Venus, Lista, Binance Web3 Wallet.

B2B integrations.

03

Residency

10 weeks on-site, curriculum + mentorship from operators who scaled BNB Chain consumer products to first 100k users.

Founder network.
